

When you purchase a Lollapalooza BeGreensm Fan Tag, we will provide you with 500 kWh of renewable energy certificates to offset a portion of the emissions you create by traveling to and from the Lollapalooza event.

PRODUCT CONTENT LABEL

Your purchase of renewable certificates is supporting renewable electricity production in regions across the U.S. For every unit of renewable energy generated, an equivalent amount of renewable certificates is produced. The purchase of renewable certificates helps offset conventional electricity generation in the region where the renewable generator is located. The purchase also helps build a market for renewable electricity and may have other local and global environmental benefits such as reducing global climate change and regional air pollution.

The product is sold in blocks of 500 kWh. The product will be made up of the following new renewable resources.

New ¹ Renewable Resources BeGreen sm Fan Tag	the Lollapalooza	Generation Location
New Renewables	100%	Nationwide
¹ Includes renewable generators that first started operating after January 1, 1997 or as regionally defined.

Green Mountain Energy Company's Commitment to You

Each 500 kWh block of this Green Mountain Energy[®] product represents the environmental attributes resulting from the generation of 500 kWh of electricity by renewable energy generators serving the national power grid. These environmental attributes include all fuel source, emissions, air quality and other environmental characteristics and benefits resulting from the generation of energy by the applicable renewable energy resource, excluding any state or federal production tax credits, production tax incentives or production tax grants generated or earned by the renewable resource facility owner. Environmental attributes may be used to offset or reduce the pollution impact of an equivalent amount of electricity generated from the sources used to generate typical system power in the region where the renewable generation facilities are located. Please see the Product Content Label above for additional information about this product.

Your purchase of this product supports renewable electricity production in the United States. You will continue to receive a separate electricity bill from your utility. The purchase of renewable certificates helps offset conventional electricity generation in the region where the renewable generator is located. For this product, the location of the renewable generation may be anywhere in the continental US. The purchase also helps build a market for renewable electricity and may have other local and global environmental benefits such as reducing global climate change and regional air pollution.

For each Lollapalooza BeGreensm Fan Tag that you purchase, Green Mountain ensures that 500 kWh of electricity is generated from 100% new renewable generation facilities and delivered to the national power grid over the course of one year. To verify this delivery, Green Mountain will retire renewable energy certificates on your behalf. These renewable energy certificates will be generated in the calendar year of your purchase, the first three months of the following calendar year, or the last 6 months of the prior calendar year; and will be retired once and only once.

Price and Payment

The price for this *Green Mountain Energy* product is \$5.00 above and beyond any charges paid to the event ticket seller for a ticket to the event.
